

# DIGITAL SIGNAGE

ADVERTISE ANYWHERE

simple | smart | everywhere

# Overview

## Simple Network Solution

No software installation is required once you have connected the Cloud Network Media Players to your screens. The screens in your network can all be under one roof or as part of a national or global network. Just by logging in to our cloud based CMS you can control your screens individually or as part of a network.

## Built in Wi-Fi

Connect the screen to the CMS wirelessly via the integrated Wi-Fi, Ethernet or by LAN

## Cloud Based Digital Signage Software

Transform your screen into a remotely updateable advertising display with our Network Media Player. With our online CMS you can upload content, design multimedia layouts, create your own personalised playlists and schedules as you take control of your screen.

## Environmentally Friendly Power Timer

Allows for a reduced power usage in those hours that the displays are not required. Set daily or weekly On/Off times for your displays.

## Integrated Android Media Player

The integrated Android Media Player allows for super fast updates. If required you can also run third party Digital Signage software via the Android PC board.

## Commercial Grade

Designed for use in commercial applications this media player can run 24/7. There are no external buttons or controls to avoid tampering.

## Backup USB updates

In the event that your internet connection goes down, there is a backup procedure that means you can still package your Network Digital Signage content onto a USB stick and insert into the Media Player to update your content. After copying over the content you can remove the USB stick and the content will start playing as normal.

## Cloud Based Software

The Cloud Network Media Player transforms your screens into remotely updatable advertising displays. Start by logging into our cloud based

## Simple Network Solution

No software installation is required once you have connected the Cloud Network Media Players to your screens via HDMI or VGA. The screens in your network can all be under one roof or as part of a national or global network. Just by logging in to our cloud

## Features

### Android Media Player

Their Android PC board provides a super fast processing speed allowing for improved communication with the CMS and means you can update your screens quicker than ever before. The Android Cloud Network Media Player also allows you to run your own software should you already have a CMS solution.

### Remote Screen Functions

You can control most of your screen's functions via the CMS, such as playing and stopping content as well as volume control; a truly centralized solution. Records are kept of all screen and user activity so as you can monitor the usage and effectiveness of your content.

### Manage Your Users

You may wish to limit some functions or zones to specific users. For example you may wish to allow a receptionist to have access to the screen in the reception area but nothing else – our system allows full user rights control.

### Update Your Screen From Anywhere

Content can be uploaded and managed from anywhere in the world via our web portal, simply login, upload your images and videos to our secure server and send them directly to your screens.

### Schedule Playlists

You can determine exactly what content is displayed and when. Create playlists that will automatically display your desired content at pre-determined times and dates. Whatever your scheduling requirements, our system can support them.

# Key Features

## Static Text

Allows you to input custom text values

## Office Documents & PDF 3

Display PDF files alongside Microsoft Word, Excel and PowerPoint files

## Webpages

Allows you to display a live webpage such as a social media page or live web feed

## Videos

Multiple videos playing in a continuous rolling loop

## Image

Multiple images playing in a continuous rolling loop

## Logo

Brand your layout with your logo which will stay on top of all other zones

## Scrolling Text

Display a ticker tape message or live RSS feed. From here you can adjust the font, size, color, speed and direction of the text

## Time

Display the time in a variety of formats, sizes and in whatever color you want

## Date

Display the date in a variety of formats, sizes and in whatever color you want

## Weather Widget

Display a real time weather forecast for up to the next three days

## Background

Set an image or a color to frame your media zones

# Real-time Features

## Dynamic Table

Update the playback content on terminal displays in real time without re-publish a new program
